

# Brand-New Handy Black Light LED SUPER-LIGHT

# D-10LA-3

## Best solution for fluorescent NDT applications and contamination check !

Super-Light D-10LA is an effective light source for checking of fibriform rags, organic matters, oil, skin-flakes, etc. which generate fluorescence.

D-10LA irradiates long wave ultraviolet radiation, with the combination of high-performance 16W LED bulb.

**NEW!!**

### Features

- **Compact and Light weight**

The lamp weights only 500g.

D-10LA will lighten your burden in the long operation.

- **Energy saving**

Power consumption reduces more than 75% of conventional product (metal halide type).

It realizes 10,000h of Long lamp life (representative value).

- **Easy to use**

Just plug in to use, instant-on lighting.

It can use with input voltage 100 - 240V / 50 - 60Hz.

- **Upgraded Filter D-10LFPB**

Very clear to inspect because the background has removed.

No Filter

With Upgraded Filter D-10LFPB

### Specification

Light source	LED 1pc.
Main wave length	365nm (UV-A)
Bulb life	10,000h (Representative value)
Input voltage/ Power consumption	100 - 240V / Approx. 16w
Light time to recover	Instant - on lighting
Power cable length	4.5m (Adaptor cable 2m)
Size/Weight	φ110 × 135L × 230Lmm / Approx. 0.5kg

Integrated supplier of Non-Destructive Testing and Marking

**MARKTEC**
